

INFRARED AND ULTRAVIOLET ACCESSORIES

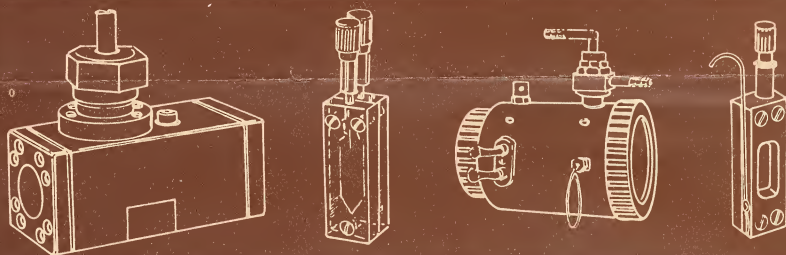

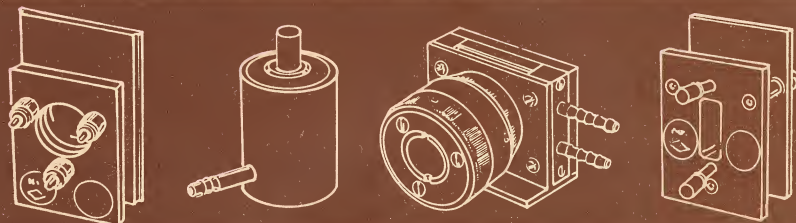

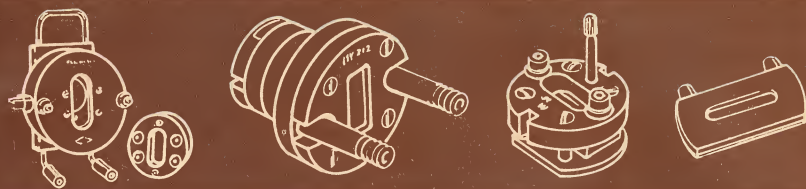

Scientific instruments and
accessories precision
crafted for accuracy from
Limit Research Corporation

Variable Path Length IR Cells
Sealed and Demountable IR Cells
Nujol Cells
Micronujol Cells
Microcells
Window Polishing Kit
Beam Condenser and Accessories
Throwaway IR Cells
Gas Cells
Minimum Volume Gas Cells
IR Heated Gas Cells
IR Heated Cells
IR Heating Jackets
Variable Temperature IR Unit
Reference Beam Attenuator
Linearity Discs
Standard and Micro ATR Units
Variable Path Length UV Cells
High Pressure UV Cell
Blood Oxygen Cell
Short Path Length UV Microcells
Short Path Length UV Cell
KBr Dies
X-ray Dies
Hydraulic and Hand Presses

Something for almost everyone in the field of IR and UV research

From a tiny throwaway cell to a hydraulic press, which can deliver a compression force of 30 tons, Limit offers a variety of accurate and reliable instruments designed specifically for the scientist engaged in IR and UV spectroscopy. Using the finest of materials, these instruments are machined to exacting tolerances so that the work, for which they are used, can be done swiftly and with great precision.

Limit will be glad to help select the right accessory for you—write or phone . . .
